

Waterproof Outdoor Wall Mount PA Speakers

Harmony B5

≡ Product introduction:

Harmony B8 Waterproof Outdoor Wall Mount PA Speakers is one of ADTESU's signature products where we demonstrate our real strength in audio product development and also in response to a new emerging market demand for wall mount speakers that goes beyond the need of quality sound, but also in terms of durability, light weight, easy to install and a touch of aesthetic in the exterior design.

≡ Features:

- **Aesthetic appeal of minimalist streamlined design:** We developed Harmony B8 to redefine a new design trend for wall mount speakers market where Beauty, Durability, Performance and User Friendliness come as ONE CORE CONCEPT right from the initial stage of the product design.
- **Hassle free assembly & installation:** Putting Harmony B8 together is super easy, because every necessary parts, the front grill, the elegant back covers comes with a hassle free "Snap On" design. You can say goodbye to glue based assembly.
- **Optimal bass enhancement radiator:** a state-of-the-art bass radiator design using ADTESU's exclusive Optimal BASS Enhancement (OBE) Technology that will deliver an outstanding deep and clear bass audio experience even without any extra subwoofer support.
- **Perfect for outdoors application:** within the robustly built smooth curves speaker's cabinets is the use of premium grade material with the perfect tensile strength PLUS a certified IPX66 Waterproof standard to meet the demands for various commercial environments.
- **Robust, seamless and ultra strong mounting:** Harmony B8 Wall Mount Speakers also comes with a Ultra Strong STEALTH Speaker Mount that allow the speakers to be securely mounted while elegantly merge to the walls of almost any interior or exterior décor.

- **Two types of terminations:** Harmony B8 wall mount speakers is available with two types of terminations, one is a pluggable terminal blocks and the other is standard pressed connector.
- **Elegant rear covers design:** these unique rear covers “functional design” not only helped to cover the Euroblock Connector and Bypass Selector (PA Transformer) in the rear of the speaker, it is also designed to merge seamlessly with the OBE Bass Radiator along with the overall design of Harmony B8 , giving it an extra touch of modern sophistication.
